

# **DIPPING NAVELS**

## **1. Use fresh clean navel dip**

- **Always dump soiled dip; use fresh dip before every calf.**
- **Navel dip is brown and has an alcohol smell.**

## **2. Wash off “MUD” with dip**

- **“MUD” is manure, urine and dirt.**
- **Use enough dip to get a clean umbilical cord and navel opening at belly.**

## **3. Dip the full length of the cord in clean navel dip. Coat navel opening in belly with dip.**

## **4. Redip after the calf is removed from the dam.**
