Fly Control

Well guys we are getting closer to planting and haylage making, yea! Along with that comes flies, yuck!! We are here to help you control them with a complete program that is sustainable for the season. We work with the experts from Kunafin a company that has been in the business since 1959. With their help we can help you put together a complete program for fly control, just as your nutritionist does for feeding your cows or crop consultant does for your corn and hay. Remember bunching cows with tails wagging or feet stepping all over are not happy, comfortable or productive.
